

Symantec Asset Management Suite 8.5 Administration

Course Code: 00033748

Course Description

The *Symantec Asset Management Suite 8.5 Administration* course is designed for professionals tasked with using Asset Management Suite (AMS) to manage their software and hardware resources in their organizations. This two-day, instructor-led, hands-on course teaches students the underlying components and concepts of the Symantec Management Platform along with the Symantec Management Console that is used by AMS to perform its management functions. Students learn how to use AMS software solutions to manage their software, account for and track assets, and to manage license compliance. Students also learn how to use the platform consoles and reports to analyze and monitor their environment.

Delivery Method

Instructor-Led

Duration

Two Days

Course Objectives

- Discover and import computer and user resources that you want to manage
- Gather hardware, software and operating system inventory
- Remotely manage computers
- Maintain a software repository
- Deliver software to managed computers
- Meter and track software on managed computers
